

Rishik Vishwakarma

Madison, WI | +1 (608) 443-8020 | rvishwakarma@wisc.edu | [Portfolio](#)

Education

University of Wisconsin–Madison

B.S., Computer Science & Data Science | Dean's List (Spring 2025)

Madison, WI

Expected May 2028

Technical Skills

Languages: Python, R, SQL, Java, JavaScript, HTML, CSS

Data & ML: Pandas, NumPy, Scikit-learn, XGBoost, Matplotlib, Seaborn, ggplot2, Streamlit, Regression, EDA

Tools: Git/GitHub, Jupyter, RStudio, SQLite, JDBC, Chrome Extension APIs (Manifest V3)

Projects

P-31 NMR Experiment Analysis Dashboard | Python, Pandas, Streamlit, SQLite, Regex

[Live Demo](#) | [GitHub](#)

- Replaced manual review of 50+ P-31 NMR experiments with a Streamlit dashboard built for UW–Madison's Kacar Lab
- Parsed inconsistently recorded values (e.g., "265/200", "15x4") with regex and added filters for chemical, temperature, time, and cycle count, cutting interpretation time from about 3 days to 2 hours
- Held weekly requirement sessions with the researcher and added SQLite storage and CSV export; outputs lab-validated

Student Performance Predictor | Python, Scikit-learn, XGBoost, Streamlit

[GitHub](#)

- Predicted final math grades and pass/fail for 395 students (UCI dataset, 33 features) by comparing 12 configurations of linear/logistic regression, random forest, and XGBoost
- Tested whether prior grades were hiding other signals by training with and without them: accuracy dropped from 89% (0.97 ROC-AUC) to 67%, revealing past failures, school support, and absences as the top non-academic predictors
- Made the models usable by engineering composite features (parent education average, study-to-going-out ratio) and deploying them in a Streamlit app with live predictions and feature importance

Internship Application Tracker (Chrome Extension) | JavaScript, Chrome APIs

[GitHub](#)

- Replaced manual application tracking with a Chrome extension that auto-detects postings on 8+ ATS platforms (LinkedIn, Workday, Greenhouse, Lever, Ashby)
- Handled differing page layouts with platform-specific DOM extractors plus an Open Graph fallback for unsupported sites
- Added one-click save, status tracking, search/filter, and CSV export; all data stays on-device via chrome.storage.local

Movie Budget vs. Box Office Analysis | R, ggplot2, Regression

[GitHub](#)

- Tested whether budget predicts box office revenue (STAT 240) by fitting an OLS regression in R on Kaggle/TMDB data
- Confirmed a highly significant positive relationship ($p < 2 \times 10^{-16}$); spotted heteroskedasticity in the residuals and recommended robust standard errors to keep inference valid

Experience

Division of Information Technology (DoIT), UW–Madison

Apr 2026 – Present

IT Support Specialist

Madison, WI

- Triage 50+ authentication and access tickets per week (SSO, MFA, Microsoft 365, LMS, video) for a 60,000+ user campus
- Noticed MFA enrollment, token conflict, and certificate errors recurring in ticket history; wrote runbooks for each, reducing repeat escalations by an estimated 5–10%

SuccessWorks, College of Letters & Science, UW–Madison

Aug 2025 – Present

Career Peer Advisor

Madison, WI

- Advised 200+ students 1:1 on resumes, interviews, and offer negotiation, earning 90% satisfaction on post-session surveys
- Led 3 parent-facing recruiting events with 10+ employer partners, reaching 500+ students
- Ran CS/SWE-focused resume review and interview prep workshops for students targeting technical roles

Leadership & Activities

International Student Services Advisory Board, UW–Madison | Board Member

Aug 2026 – May 2027

- Selected to a monthly advisory board shaping policies and programming for UW–Madison's 6,000+ international students

UW–Madison Badminton Club | Fundraising & Events Chair

Aug 2025 – Present

- Raised \$2,000+ in sponsorships to fund club operations and competitive play
- Delivered 2 national-level tournaments (Steve Rader Tournament, Madison Open) on schedule by managing logistics, scheduling, and on-site resources, with zero financial discrepancies
